

World Class Cleaning Solutions®

June 1, 2015

Dear Valued Customer,

The product **Safety Data Sheet (SDS)** for the product that you are attempting to access is not available at this time. The reason for the delay is that NCL, despite repeated efforts to do so, has to date not received adequate information from upstream raw material suppliers to compose a GHS Compliant Safety Data Sheet. Please note that SDS are now available on the vast majority of our product line, and available for download from our website.

As stated in the **OSHA Enforcement Guidance for the Hazard Communication Standard's (HCS) June 1, 2015 Effective Date**, discretion will be used for companies *“Establishing reasonable diligence and good faith effort requires that the manufacturer or importer demonstrate attempt(s) to obtain the necessary SDSs through both oral and written communication directly with the upstream supplier. Further, “A manufacturer or importer must create HCS 2012-compliant SDSs within six months from the date it receives all of the hazard information for the ingredients in a mixture”.*¹

As to the ingredients contained in this product, NCL has made every effort to acquire the information from upstream raw material suppliers, and has documented our attempts to gain this information in advance of the June 1st, 2015 deadline. We anticipate that any delay in SDS publication for this product will be short term, and would advise you to re-visit the SDS Link from which you accessed this letter in the near future.

Thank you for your understanding in this matter.

Sincerely,

NCL Regulatory Affairs
